
Radar Array Processing

radar array processing of experimental data via the scan ... - this report demonstrates a novel algorithm of radar array processing that was developed at the u.s. army research laboratory (arl) and named the scan-multiple signal classification (smusic) algorithm. the algorithm can improve angular resolution of real targets when a single rotatable antenna is used as the sensor. **array signal processing algorithms for beamforming and ...** - array processing is an area of study devoted to processing the signals received from an antenna array and extracting information of interest. it has played an important role in widespread applications like radar, sonar, and wireless communications. numerous adaptive array processing algorithms have been reported in the literature in the last ... **fundamentals of signal processing for phased array radar** - allows to use one phased array radar as multi-function radar. optimisation of individual radar tasks: optimised waveforms for search, acquisition and track, high precision measurements when required, variable beam shapes, optimised algorithms for tracking (the fundamentals of signal processing for phased array radar rto-en-set-086 1 - 3 **introduction to array processing - isae-superaero** - 1 radar, sonar (detection, target localization, ... o. besson (isae-superaero) introduction to array processing 5/106. contents 1 introduction 2 array processing model principle multi-channel receiver source signals signals received on the array covariance matrix 3 beamforming 4 source localization o. besson (isae-superaero) introduction to array ... **maximum likelihood methods in radar array signal processing** - maximum likelihood methods in radar array signal processing a. lee swindlehurst, member, ieee, and petre stoica, fellow, ieee we consider robust and computationally efficient maximum like-lihood algorithms for estimating the parameters of a radar target **signal processing algorithms for mimo radar** - nas. this in general reduces the processing gain compared to the phased array radar. the multiple arbitrary waveforms also affects the range and doppler resolution of the radar system. the main contribution of this thesis is to study the signal processing issues in mimo radar and propose novel algorithms for improving the mimo radar system. **adaptive array processing for multi-mission phased array radar** - the radar samples the scene at 0.5 angular azimuthal spacing, for 15 range gates, and for the 0.5 , 1.5 , 2.5 , and 3.5 elevation angles. the storm is approximately 32 km from the radar, while the radar is pointed 10 above the ground to emulate the mpar configuration. the sim-ulated array has less than 1,100 elements compared to **radar signal analysis and processing using matlab® - gbv** - radar signal analysis and processing using matlab® bassem r. mahafza decibel research inc. huntsville, alabama, u.s.a.
