
Radar Detection And Tracking Systems

detection and measurement of radar signals: a tutorial - detection and measurement of radar signals: a tutorial 7th annual isart frank h. sanders ntia institute for telecommunication sciences 1 march 2005 **radar fundamentals - naval postgraduate school** - • with regard to radar, high gain and narrow beams are desirable for long detection and tracking ranges and accurate direction measurement. $4/2$, effective area = aperture area efficiency (0 1) $h t g n e l e v w a / , e e g a a a c f \pi \lambda \epsilon \epsilon \lambda = = \leq =$ low gain high gain (small in wavelengths) (large in wavelengths) antenna directional **radar technology in surveillance - axis** - using radar technology for detection can reduce the number of false alarms and increase detection efficiency in conditions with poor visibility. axis d2050-ve network radar detector is axis first available radar-based motion detector. owing to its advanced tracking algorithm, it is not only an affordable complement to security cameras, but it can **calculation of radar probability of detection in k ...** - modelling of the radar returns from the sea is required for operations analysis of maritime patrol, in order to calculate probabilities of detection for targets of interest. the detection performance of maritime radars is usually limited by sea clutter. a statistical model of the **marine radar detection performance comparison - ssr eng** - marine radar detection performance comparison july 12, 2011. radar detection comparison ssr engineering, inc. 1 of 67 overview this document was designed to provide a simple comparison of the detection performance for several commercially available radars operating with different antenna lengths. radar model type power ... **chapter 1 — basic radar principles and general characteristics** - chapter 1 — basic radar principles and general characteristics introduction the word radar is an acronym derived from the phrase radio detection and ranging and applies to electronic equipment designed for detecting and tracking objects (targets) at considerable distances. the basic principle **radar detection of hydrocarbon gas seepage associated with ...** - radar detection of hydrocarbon gas seepage associated with underground oil and gas deposits summary simple marine radars have been used, with apparent success, by several petroleum-exploration companies for the detection of hydrocarbon gas seepage from underground deposits of oil or gas. the descriptions of the radar **weather radar basics - cocorahs** - weather radar basics. radar: radio detection and ranging • developed during world war ii as a method to detect the presence of ships and aircraft (the military considered weather targets as noise) • since ww ii, there have been many advances in radar **a periscope detection radar - applied physics laboratory** - a periscope detection radar detection of small cross-sectional periscopes with short, transient exposure periods requires a radar system with a sensitive detection threshold. airborne radar detection systems were designed to provide such a capability in the open ocean. in littoral regions, however, these systems are manually intensive, and ... **airborne weather radar limitations** - airborne weather radar limitations by john werth, seattle artcc center weather service unit is airborne weather radar better, more timely or accurate, than the weather and radar processor (warp) nexrad mosaics used by federal aviation administration (faa) air traffic controllers? ... detection systems, they're just different. **2.0 radar range equation - engineering - departments** - 2.0 radar range equation 2.1 introduction one of the simpler equations of radar theory is the radar range equation. although it is one of the simpler equations, ironically, it is an equation that few radar ... the things it impacts, like detection theory, matched filters and the ambiguity function. **introduction to detection theory - computer engineering** - introduction to detection theory (cont.) we wish to make a decision on a signal of interest using noisy measurements. statistical tools enable systematic solutions and optimal design. application areas include: • communications, • radar and sonar, • nondestructive evaluation (nde) of materials, • biomedicine, etc. **chapter 1 introduction to ladar systems - spie** - chapter 1 introduction to ladar systems 1.1 background radar (radio detection and ranging) is the process of transmitting, receiving, detecting, and processing an electromagnetic wave that reflects from a target. radar was first developed by the german army in 1935.1 as theoretical and technical developments continued, radar techniques and **radar detection and identification of human signatures using** - radar detection and identification of human signatures using moving platforms approved by: dr. douglas b. williams, advisor professor, school of ece georgia institute of technology dr. william l. melvin, advisor georgia tech research institute georgia institute of technology dr. james h. mccllellan professor, school of ece
